BASE BID The Work to be completed for this Project consists of furnishing all labor, materi-als, earthwork, construction operations, details, supervi-sion and coordination of all trades, utility suppliers, gov-ernmental inspections and approvals to complete the construction, installation, and coordination for the City of Dacula "McMillan Road Stormwater Impr Project" as follows: Improvements

The City is having issues with the existing storm pipe and structures holding and structures holding stormwater and ponding out into McMillan Road near proposed JB 1-H. In order to alleviate this issue, the Scope of Work will include demolishing the existing storm sewer system from proposed JB 1-I downstream to the creek through the City's adjacent property.
An entire new Storm Sewer
Outfall System will be installed in its place. The existing pipes have been TV inspected with varying results. The storm line upstream of JB 1-H is holding stormwater up to the existing grate inlet at the northwest corner of Wildel Institute of Management (1986). of Winder Hwy. and McMillan Road. The Contractor shall excavate and replace the existing pipe crossing underneath McMillan Road and replace with new RCF culvert and junction box adcurvent and function box adjacent to building or where buried junction box is located. Contractor will then investigate and cleanout the existing 36" RCP Box Culvert which appears to cross underneath the corner of the existing building. The existing grate inlet at northeast corner of Winder Hwy. and McMillan Road will need to be reconstructed and top made accessible with steps for access and clean out of downstream pipe. Contrac-tor will also cleanout existing 24" RCP storm sewer line extending north from proposed JB 1-H underneath posed JB 1-H underneath Winder Hwy. and Railroad to upstream headwall adjacent to Hebron Church Road.

The Demolition scope also includes removing all asphalt pavement along McMillan Road from right-of-way of Winder Hwy. south to limits of removal as illustrated on the Drawings Illustrated of the Drawings. The remainder of McMillan Road from the removal limits to the 4-Way Stop at Church Street will be milled and repaved. A deep patch milling detail is included if any pavement areas need additional repair. The City's adjacent lot which is currently fenced can be used as a laydown area for construction. At end of construction. Contractor shall remove all existing pavement within the fenced limits and fine grade area to drain to new storm sewer weir inlets and stream buffer. Fence will need to be disassembled and stored un-

ADVERTISEMENT FOR RIDS

til construction is complete and then reinstalled by the Contractor

A new storm sewer outfall line and structures will be in-stalled along McMillan Road and extend west down along the outside of the stream buffer until it can be dis-charged into the stream buffer as illustrated on the Drawings. A new junction box (JB) will be installed on the east side of McMillan Road adjacent to the existing building where the existing 36° RCP Box Culvert ties into the 30° RCP culvert running underneath McMillan Road. This new JB will be installed where the Contractors. where the Contractor uncovers the buried existing junction box or as illustrated on the Drawings to provide accept to alphabian aut the cess to cleaning out the existing 36" RCP Box Culvert.

A new 36" RCP culvert will be installed underneath McMillan Road from JB 1-1 to JB 1-H; then a 48" HDPE storm line and structures will be installed behind the will be installed believe running along the west side of McMillan Road. McMillan Road will be regraded from Winder Hwy. right-of-way limits south to a new low which is created farther away from Winder Hwy. Curb & Gutter will be in-stalled along the west side of newly regraded McMillan Road. A new Double Wing Catch Basin (DWCB 1-F.1) will be installed to drain stormwater from this low point with a 24" HDPE pipe installed to drain stormwater to outfall storm sewer at JB 1-F.

The remaining 48" HDPE storm outfall sewer will ex-tend south to the stream buffer and turn west at JB 1buffer and turn west at JB I-E and then continuing drain-ing till it discharges into stream buffer at Headwall (HW 1-A). Contractor shall minimize disturbance within stream buffer and limit grading and disturbance operations to pipe, headwall, tions to pipe, hea riprap installation only. In addition McMillan Road

at limits of regrading near existing low point at stream crossing shall be milled and repaved as illustrated on the Drawings up to the 4-Way Stop at Church Street. Contractor shall document all existing striping and replace in-kind including but not lim-ited to "Railroad Ahead" striping, stop bars, double striping, stup bals, doubled centerline striping, and parking lot lines. Install eight (8) new concrete curb stop blocks at parking spaces to prevent damage to building. Existing DWCB's and storm pipe at low point near stream crossing shall be cleaned out and paved in-verts installed to drain. Ex-isting HDPE pipe and French Drain draining into existing DWCB on west side McMillan Road near Station 3+10 needs to be cleaned out and/or replaced to drain low point area behind DWCB

and existing house. McMillan Road shall be MCMIIIan Road snail be repaved with Heavy Duty Pavement Section. Parking area adjacent to McMillan Road and Building shall be repaved with Standard Duty Pavement Section Milled repayed with standard buty Pavement Section. Milled areas shall be milled 2.5" un-less a deep patch section is needed (to be approved by Owner prior to additional milling and paving) and then repaved with tack coat, 1° of 'D' Mix Asphalt Binder Course, and 1-1/2" Type 1 - F' Mix (9.5 mm) Asphalt Surface Course. All new pavement repair shall have smooth transition with adjacent existing asphalt milling and paving) and then cent existing asphalt. Sedimentation,

Erosion, Sedimentation, and Pollution Control Measures are part of the Contractor's Scope of Work.
BMP's shall be installed on all existing and new storm inlets as well as Double Row Type 'C' Silt Fence along See Draw Stream Buffer ings for all BMP's to be installed. All disturbed areas will be

permanently grassed with Erosion Control Matting and D. permanent Bermuda Seed. Any disturbance adjacent to or within a homeowner's front yard shall be perma-nently stabilized with Bermuda Sod. Removal of all vegetation and trees within lim its of work shall be included in Contractor's overall Bid unless otherwise illustrated on the drawings. Traffic ac-cess to streets and private driveways shall remain open at all times unless approved by the Owner. If road clo-sure is granted, then Con-tractor shall provide Traffic Control Plan and all detour signage required in his over-all Bid.

All earthwork quantities for grading, pipe bedding, and backfill whether haul-in and/or haul-off are the responsibility of the Contractor to include in their Lump Sum Bid in order to com-plete the Scope of Work at no additional cost to the Owner. All quantities and

ADVERTISEMENT FOR BIDS

measurements are approximate. Contractor shall visit the Site and determine his own quantities for bidding this project.

Contractor shall include in their Base Bid all costs for adjusting and relocating any water and gas services lines, meters, or valves impacted by new storm line installa-tion in order to complete the scope of work as described by the Contract Documents and Drawings. Contractor shall coordinate with utility companies and relocate utilities as required to install new improvements. tractor must be qualified with Gwinnett County in or-der to perform water line in-stallation, relocation and re-

One lane of traffic and ac-One lane of traffic and access to residential/commercial driveways must be maintained at all times unless road closure is granted by the City as stated above. Traffic Safety devices such as signage, barricades, etc., and the protection of the public-at-large, and the Contractor's personnel is part of this contract and is the Contractor's sole responsibility. Tractor's sole responsibility.

The Contractor will have Ninety (90) consecutive calendar days from the "Notice to Proceed" to finish and complete the project complete the project.

All materials and appurtenances required to complete this Scope of Work is the responsibility of the Contractor and shall be provided in his overall Bid. The Contractor must be an approved Contractor with the City of Dacula and/or Gwinnett County, A complete list of materials should be included in the should be included in the Contractor's overall Bid. Bidder will prepare Asphalt prices for bid based on the current GDOT Asphalt Ce-

ment Price Index listed at the time of bid opening. The successful Contractor's pay request will list the current GDOT Asphalt Cement Index at the time of pur chase. The difference price between the GDOT As nhalt Cement Price Index at phalt Cement Price Index at bid and at purchase will either be a change order to the Contractor or a Credit to the Owner. The GDOT Asphalt Cement Price Index is in accordance with Special Provision 109 (dated 2008), Section 400.5.01 Adjustments, the asphalt price index for the asphalt price index for the month of the Letting posted on the Georgia Department of Transportation Website.

Additional its Scope of Work items within

A site visit must be made by Contractor subcontractors to detern the exact nature and scope the work to be done Contractor is responsible for hauling off all demolition materials (existing pipe, con-crete, asphalt, etc.) to a State approved disposal facility at no additional cost to the Owner. Contractor shall tie in and feather new asphalt into existing asphalt so that there is a smooth transition.

If any unforeseen subgrade conditions arise the Contractor shall immediately notify the Owner and/or Owner's representative before proceeding with any work to determine the work to determine the course of action. The Contractor shall have a Geotechnical Engineer (who will be selected by the Contractor and approved and paid for by the Owner) qualify and quantify the areas and deter-mine the method of subgrade repair in coordination with the Owner and/or Owner's Representative on a case-by-case basis.

The limits of work for this project are limited to that area within the right-of-way of City of Dacula and City owned property in order to perform the paving and storm sewer drainage pip and structure installation a described by scope of wor in the Contract Documents.

Contractor is responsible to locate horizontally and vertically all existing utilities within limits of disturbance and protect throughout duration of project. which are present include water, gas, electrical, CATV, AT&T, etc., but may not be limited to these within the limits of disturbance. All existing utilities chall be least isting utilities shall be located and protected from damage by the Contractor

waive any informalities and any technicalities, and to re-

Contractor shall have a Site Superintendent on-site at all times while work is in progress to monitor, direct, and control construction ac-tivities.
